CDL is a paperless CDL system for examiners, administrators and auditors to efficiently conduct vehicle inspection, basic control skills and road tests.

**BENEFITS**

- **Proven Electronic Testing System**
  Based on the current eCDL system, an enhanced mobile design minimizes errors, improves scoring accuracy and reduces registration/exam processing times.

- **Affordable Equipment and Maintenance Costs**
  Optimized for Android tablets to reduce start-up and maintenance costs without sacrificing speed or reliability.

- **Eliminates Redundant Data Entry**
  Wireless transmission and system integration eliminate the need for paper forms and time-consuming, error-prone, data re-entry into external systems such as CSTIMS.

- **Meets State and Federal Standards**
  Approved for use by AAMVA and meets CFR Title 49, Subtitle B; Chapter III, Subchapter B, Parts 383-384 CDL standards and state compliance.

**FEATURES**

- **Custom Forms, Reports and Analytics**
- **Seamless Integration with CSTIMS and State Systems**
- **GPS Enabled for Auditing, Monitoring and Fraud Detection**
- **Exam Auditing and Quality Assurance Tools**
- **Technical Support & Training**

**A Paperless CDL Testing Solution**
